T. GURU HEMANTH

DevOps Engineer | AWS | Azure | Kubernetes | Docker | Terraform | CI/CD

Chennai, India|+91 7993393713 | guruhemanth0@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

DevOps Engineer with **3 years** of production IT experience across **infrastructure automation**, **Linux administration** and **cloud-native deployments**. Hands-on with **AWS** and **Azure**, **Kubernetes**, **Docker**, **Terraform**, **Jenkins**, **GitHub Actions** and **Python/Bash** automation for **CI/CD**, **monitoring** and **zero-downtime** releases. Also experienced in **disaster-recovery automation**, **patch deployment with rollback**, **security assessment** and **2FA authentication** infrastructure.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, EKS, ECS Fargate, RDS, S3, IAM, Route 53, CloudWatch, ALB/NLB, ECR), Azure (AKS, ACR, VNet, NSG)
- **DevOps & IaC:** Git, Terraform, Ansible, Docker, Kubernetes, Helm, Jenkins (CI/CD Pipelines), GitHub Actions
- **Languages & Scripting:** Python, Bash Shell Scripting, JavaScript, SQL
- **Operating Systems & Web:** Linux (Ubuntu, Red Hat RHEL, CentOS), Windows Server, Erlang Reverse Proxy, Apache HTTP Server
- **Databases & Monitoring:** PostgreSQL (Cluster Management), OracleDB, Redis, Prometheus, Grafana, AWS CloudWatch, ELK Stack
- **Security & Testing:** JWT, OAuth 2.0, Bandit (SAST), pip-audit, Trivy, Semgrep, Burp Suite, Wireshark, JMeter Load Testing

PROFESSIONAL EXPERIENCE

Odyssey Technologies | DevOps Engineer **July 2024 – May 2026**

Chennai, India | Project: Cloud-Native 2FA Microservices | Azure,Terraform, Jenkins, Docker, Kubernetes, Python Flask, Node.js

- Provisioned an **AKS** cluster, private **ACR**, **VNet** with **NSG** rules and an SSH jumpbox using **Terraform**, with an **AcrPull managed identity** for credential-less image pulls and **ProxyJump** access to private worker nodes.
- Built a 5-stage **Jenkins CI/CD pipeline** for **Docker** multi-image builds, versioned **ACR** pushes and rolling **Kubernetes** deployments, cutting release time from **30+ minutes to under 5**.
- Deployed a zero-trust, two-tier microservices setup (Flask frontend with 2 **HA** replicas behind a **LoadBalancer**, Node.js signing backend on **ClusterIP** with **CoreDNS** discovery) and fixed **ImagePullBackOff** and **VMSS SSH** issues.
- Wrote production **Bash** deployment scripts that reduced deployment time by **40%** and manual errors by **95%** across **30+ client enterprise environments**.
- Built **Bash** telemetry and 24/7 **server health-check automation** tracking CPU, memory, disk and service availability, which sped up anomaly remediation.
- Developed **DC-DR switchover** precheck scripts and automated **patch deployment** with built-in **rollback**, lowering risk and downtime during failover cycles.

Odyssey Technologies | Trainee Engineer **June 2023 – June 2024**

Chennai, India

- Configured and administered clustered **Erlang reverse proxy** servers and **load balancing** for **high availability**, throughput and secure communication.
- Maintained production **Linux** environments, including **OracleDB** multi-node clusters, storage provisioning and failover, with **zero data loss**.
- Migrated **200,000+ 2FA enterprise users** from legacy systems to a modern platform with **100% data integrity** and zero defects.

PROJECTS

Real-Time Multi-Tenant Collection & Audit Platform | AWS / ECS Fargate **2026**

AWS (ECS Fargate, ALB, CloudFront, S3, RDS PostgreSQL, Route 53, WAF, ECR, ElastiCache Redis), Terraform, Docker, Jenkins, Socket.io, React

- Designed **multi-AZ AWS** infrastructure with modular **Terraform**: **VPC** with public, private app and isolated DB subnets, **ALB** with HTTPS/TLS and sticky sessions for **WebSockets**, Multi-AZ **RDS PostgreSQL** and **ECS Fargate**.
- Configured **RDS PostgreSQL 16** with **PL/pgSQL** triggers that log immutable before/after **JSONB** audit snapshots on every CRUD transaction, plus a **Redis Pub/Sub** adapter for **Socket.io** broadcasting across tasks.
- Built dual-stage **Jenkins** pipelines (CI and CD) running parallel linting, 34 containerized **PostgreSQL** integration tests, **Semgrep** SAST, **Trivy** scans, versioned **ECR** pushes and **ECS** rolling deployments.
- Hosted the **React 18** SPA on a private **S3** bucket behind **CloudFront** with **Origin Access Control**, using **Route 53** alias routing and **AWS WAF** rate limiting against DDoS and API abuse

Secure Banking Cloud-Native Application | AWS / Kubernetes **2025**

AWS (EC2, RDS, EKS, VPC, ELB, IAM), Terraform, Ansible, Docker, Kubernetes, Jenkins, GitHub Actions, Python Flask, PostgreSQL, Bandit, pip-audit

- Planned a 4-stage **cloud migration** (**Docker Compose** → **EC2** lift-and-shift → **EC2 + RDS** two-tier → **AWS EKS**) for a Python Flask banking **REST API** on **PostgreSQL**.
- Provisioned multi-tier AWS infrastructure with **Terraform**: isolated **VPCs**, private **RDS** subnets, least-privilege **IAM** roles and **EKS** managed node groups; fixed t3.micro **ENI** IP exhaustion with a Recreate strategy.
- Built a 7-stage **Jenkins** declarative pipeline covering Flake8, Pytest, **Bandit** SAST, **pip-audit**, **Docker** builds and automated **EKS** deployments.

EDUCATION

Panimalar Institute of Technology, Chennai | B.E. in Electronics & Communication (ECE) | CGPA: 8.54 / 10 **2019 – 2023**

Srichaitanya Junior College, Andhra Pradesh | Intermediate (B.I.E.) | CGPA: 8.73 / 10 **2017 – 2019**
